

# Behavioral Ecology

Deactivation of dietary wariness through experience of novel food

*Nicola M. Marples, Micheal Quinlan, Robert J. Thomas, and David J. Kelly*  
803

Sequential settlement and site dependence in a migratory raptor

*Fabrizio Sergio, Julio Blas, Manuela G. Forero, José Antonio Donazar, and Fernando Hiraldo*  
811

Male competition and female choice interact to determine mating success in the bluefin killifish

*Katie E. McGhee, Rebecca C. Fuller, and Joseph Travis*  
822

Assessing the function of house sparrows' bib size using a flexible meta-analysis method

*Shinichi Nakagawa, Nancy Ockendon, Duncan O.S. Gillespie, Ben J. Hatchwell, and Terry Burke*  
831

Production of insurance eggs in Nazca boobies: costs, benefits, and variable parental quality

*Howard M. Townsend and David J. Anderson*  
841

Song matching, overlapping, and switching in the banded wren: the sender's perspective

*Sandra L. Vehrencamp, Michelle L. Hall, Erin R. Bohman, Catherine D. Depeine, and Anastasia H. Dalziel*  
849

Male harassment influences female movements and associations in Grevy's zebra (*Equus grevyi*)

*Siva R. Sundaresan, Ilya R. Fischhoff, and D.I. Rubenstein*  
860

A spatial model of the evolution of quorum sensing regulating bacteriocin production

*Tamás Czárán and Rolf F. Hoekstra*  
866

Parent presence, delayed dispersal, and territory acquisition in the Seychelles warbler

*C. Eikenaar, D.S. Richardson, L. Brouwer, and J. Komdeur*  
874

Kin recognition and incest avoidance in a group-living insect

*Mathieu Lihoreau, Cédric Zimmer, and Colette Rivault*  
880

Mechanisms and fitness effects of interspecific information use between migrant and resident birds

*Jukka T. Forsman, Robert L. Thomson, and Janne-Tuomas Seppänen*  
888

Is extrapair mating random? On the probability distribution of extrapair young in avian broods

*Jon E. Brommer, Peter Korsten, Karen M. Bouwman, Mathew L. Berg, and Jan Komdeur*  
895

Strategic egg allocation in the zebra fish, *Danio rerio*

*Andrew M.J. Skinner and Penelope J. Watt*  
905

Sex and the selfish herd: sexual segregation within nonmating whirligig groups

*William L. Romey and Abigail C. Wallace*  
910

Wild Carib grackles play a producer–scrounger game

*Julie Morand-Ferron, Luc-Alain Giraldeau, and Louis Lefebvre*  
916

An experimental test of preferences for nest contents in an obligate brood parasite, *Molothrus ater*

*David J. White, Lucy Ho, Guadalupe de los Santos, and Irene Godoy*  
922

Elevated yolk androgen levels benefit offspring development in a between-clutch context

*Wendt Müller, Kinga Deptuch, Isabel López-Rull, and Diego Gil*  
929

Predicted fitness consequences of threat-sensitive hiding behavior

*Elizabeth Rhoades and Daniel T. Blumstein*  
937

A mutual understanding? Interspecific responses by birds to each other's aerial alarm calls

*Robert D. Magrath, Benjamin J. Pitcher, and Janet L. Gardner*  
944

Parasites physically block host copulation: a potent mechanism of parasite-mediated sexual selection

*Michal Polak, Lien T. Luong, and William T. Starmer*  
952

Sexual conflict over copula timing: a mathematical model and a test in the yellow dung fly

*Wolf U. Blanckenhorn, Benjamin I. Arthur, Patricia Meile, and Paul I. Ward*  
958
