

Behavioral Ecology

- Migration cues and timing in leatherback sea turtles
Scott A. Sherrill-Mix, Michael C. James, and Ransom A. Myers
231
- Deceptive color signaling in the night: a nocturnal predator attracts prey with visual lures
Chih-Yuan Chuang, En-Cheng Yang, and I-Min Tso
237
- What best explains vigilance in elk: characteristics of prey, predators, or the environment?
Stewart Liley and Scott Creel
245
- Foraging in honeybees—when does it pay to dance?
Madeleine Beekman and Jie Bin Lew
255
- Survival benefits and divergence of predator-induced behavior between pumpkinseed sunfish ecomorphs
Beren W. Robinson, Andrew J. Januszkiwicz, and Jens C. Koblitz
263
- Worker policing in the German wasp *Vespa germanica*
Wim Bonckaert, Kristel Vueringck, Johan Billen, Rob L. Hammond, Laurent Keller, and Tom Wenseleers
272
- Parent-absent begging: evidence for sibling honesty and cooperation in the spotless starling (*Sturnus unicolor*)
Elena Bulmer, Patricia Celis, and Diego Gil
279
- Male insemination decisions and sperm quality influence paternity in the golden orb-weaving spider
Theresa M. Jones and Mark A. Elgar
285
- Parasite levels in blue-black grassquits correlate with male displays but not female mate preference
Thais M. Aguilar, Rafael Maia, Eduardo S.A. Santos, and Regina H. Macedo
292
- Sexual conflict over breeding substrate causes female expulsion and offspring loss in a cichlid fish
Martine E. Maan and Michael Taborsky
302
- Mating system, sexual dimorphism, and the opportunity for sexual selection in a territorial ungulate
Cécile Vanpé, Petter Kjellander, Maxime Galan, Jean-François Cosson, Stéphane Aulagnier, Olof Liberg, and A. J. Mark Hewison
309
- Social constraints limit dispersal and settlement decisions in a group-living bird species
Michael Griesser, Magdalena Nystrand, Sönke Eggers, and Jan Ekman
317
- Low light reflectance may explain the attraction of birds to defoliated trees
Elena Mäntylä, Tero Klemola, Päivi Sirkkiä, and Toni Laaksonen
325
- Male morph predicts investment in larval immune function in the dung beetle, *Onthophagus taurus*
Sheena C. Cotter, Maxine Beveridge, and Leigh W. Simmons
331
- Optimal group positioning after a predator attack: the influence of speed, sex, and satiation within mobile whirling swarms
William L. Romey and Emily Galbraith
338
- Evolution of parental favoritism among different-aged offspring
Joonghwan Jeon
344
- Monogamy when there is potential for polygyny: tests of multiple hypotheses in a group-living fish
Marian Y. L. Wong, Philip L. Munday, Peter M. Buston, and Geoffrey P. Jones
353
- Can experienced birds select for Müllerian mimicry?
Eira Ihalainen, Leena Lindström, Johanna Mappes, and Sari Puolakkainen
362
- Ultraviolet reflectance of plumage for parent-offspring communication in the great tit (*Parus major*)
Marion Tanner and Heinz Richner
369
- Colorful male guppies do not provide females with fecundity benefits
Andrea Pilaastro, Clelia Gasparini, Chiara Boschetto, and Jonathan P. Evans
374
- Split sex ratios in the social Hymenoptera: a meta-analysis
Joël Meunier, Stuart A. West, and Michel Chapuisat
382
- Winter male plumage coloration correlates with breeding status in a cooperative breeding species
Elena Solís, Jesús M. Avilés, Carlos De La Cruz, Juliana Valencia, and Gabriele Sorci
391
- Egg rejection behavior in a population exposed to parasitism: Village Weavers on Hispaniola
Alexander Cruz, John W. Prather, James W. Wiley, and Pablo F. Weaver
398
- Male barn swallows use different resource allocation rules to produce ornamental tail feathers
Alberto Muñoz, José Miguel Aparicio, and Raúl Bonal
404
- Ultraviolet plumage does not signal social status in free-living blue tits; an experimental test
Oscar Vedder, Peter Korsten, Michael J. L. Magrath, and Jan Komdeur
410
- Strong but variable associations between social dominance and clutch sex ratio in a colonial corvid
H.M. Salomons, C. Dijkstra, and S. Verhulst
417
- Better to be bimodal: the interaction of color and odor on learning and memory
Emma C. Siddall and Nicola M. Marples
425
- Paternity costs from polyandry compensated by increased fecundity in the hide beetle
Kathryn B. McNamara, Rachael L. Brown, Mark A. Elgar, and Theresa M. Jones
433
- Food resources, chemical signaling, and nest mate recognition in the ant *Formica aquilonia*
Jouni Sorvari, Pascal Theodora, Stefano Turillazzi, Harri Hakkarainen, and Liselotte Sundström
441
