Mimicry in coral reef fish: how accurate is this deception in terms of color and luminance?

*Karen L. Cheney and N. Justin Marshall*  
459

The effect of social facilitation on vigilance in the eastern gray kangaroo, *Macropus giganteus*

*Olivier Pays, Michel Goulard, Simon P. Blomberg, Anne W. Goldizen, Etienne Sirot, and Peter J. Jarman*  
469

Maternal effects on offspring social status in spotted hyenas

*Marion L. East, Oliver P. Höner, Bettina Wachter, Kerstin Wilhelm, Terry Burke, and Heribert Hofer*  
478

Modeling the role of competition and cooperation in the evolution of katydid acoustic synchrony

*Vivek Nityananda and Rohini Balakrishnan*  
484

Modeling rule-based behavior: habitat selection and the growth-survival trade-off in larval cod

*T. Kristiansen, C. Jørgensen, R.G. Lough, F. Vikebø, and Ø. Fiksen*  
490

Superb fairy-wren males aggregate into hidden leks to solicit extragroup fertilizations before dawn

*Andrew Cockburn, Anastasia H. Dalziell, Caroline J. Blackmore, Michael C. Double, Hanna Kokko, Helen L. Osmond, Nadeena R. Beck, Megan L. Head, and Konstans Wells*  
501

Species and population differences in social recognition between fishes: a role for ecology?

*A.J.W. Ward, M.M. Webster, A.E. Magurran, S. Currie, and J. Krause*  
511

Offspring development mode and the evolution of brood parasitism

*Donald C. Dearborn, Lauren S. MacDade, Scott Robinson, Alix D. Dowling Fink, and Mark L. Fink*  
517

The distribution of unequal predators across food patches is not necessarily (semi)truncated

*Isabel M. Smallegange and Jaap van der Meer*  
525

Testosterone increases UV reflectance of sexually selected crown plumage in male blue tits

*Mark L. Roberts, Erica Ras, and Anne Peters*  
535

Interactive effect of starting distance and approach speed on escape behavior challenges theory

*William E. Cooper Jr, Dror Hawlena, and Valentín Pérez-Mellado*  
542

Mating behavior in the seed beetle *Acanthoscelides obtectus* selected for early and late reproduction

*Darka Šešlija, Jelica Lazarević, Boban Janković, and Nikola Tucić*  
547

Condition-dependent resource value affects male–male competition in the blue–black grassquit

*Eduardo S.A. Santos, Rafael Maia, and Regina H. Macedo*  
553

What decision rules might pink-footed geese use to depart on migration? An individual-based model

*Olivier Duviez, Silke Bauer, Anne Destin, Jesper Madsen, Bart A. Nolet, Richard A. Stillman, and Marcel Klaassen*  
560

How important is sex for females of a haplodiploid species under local mate competition?

*Sven Steiner and Joachim Ruther*  
570

Why some species of birds do not avoid inbreeding: insights from New Zealand robins and saddlebacks

*Ian G. Jamieson, Sabrina S. Taylor, Lisa N. Tracy, Hanna Kokko, and Doug P. Armstrong*  
575

Theory successfully predicts hiding time: new data for the lizard *Sceloporus virgatus* and a review

*William E. Cooper Jr*  
585

Behavioral dominance between female color morphs of a Lake Victoria cichlid fish

*Peter D. Dijkstra, Sander van Dijk, Ton G.G. Groothuis, Michele E.R. Pierotti, and Ole Seehausen*  
593

The cost of infidelity to female reed buntings

*Stefan M. Suter, Joanna Bielariska, Sabine Rühlhlin-Spillmann, Ludivine Strambini, and Dietrich R. Meyer*  
601

Hotshots, hot spots, and female preference: exploring lek formation models with a bower-building cichlid fish

*Kyle A. Young, Martin J. Genner, Domino A. Joyce, and Marcel P. Haesler*  
609

Long-term growth and movement in relation to food supply and social status in a stream fish

*Eric A. Hansen and Gerard P. Closs*  
616

A trait-based approach to understand the evolution of complex coalitions in male mammals

*Lucretia E. Olson and Daniel T. Blumstein*  
624

How site fidelity leads to individual differences in the foraging activity of harvester ants

*Blair D. Beverly, H. McLendon, S. Nacu, S. Holmes, and D.M. Gordon*  
633

Sexual coercion in *Panorpa* scorpionflies?—The function of the notal organ reconsidered

*Dagmar Koch, Sierk Engels, Christiane Fritsche, and Klaus P. Sauer*  
639

Sex allocation and mate choice of selfed and outcrossed *Schistocephalus solidus* (Cestoda)

*Solveig Schjørring*  
644

Conflict over parental care in house sparrows: do females use a negotiation rule?

*Ádám Z. Lendvai, Zoltán Barta, and Olivier Chastel*  
651

Examining potential benefits of group living in a sawfly larva, *Perga affinis*

*Lynn E. Fletcher*  
657

Fleeing and hiding under simultaneous risks and costs

*William E. Cooper Jr*  
665

Reproductive skew and the evolution of conflict resolution: a synthesis of transactional and tug-of-war models

*Peter M. Buston and Andrew G. Zink*  
672
